A PRESENTATION

about the structure of the Hebrew Bible with the help of geometrical shapes and logically applied colors – from the complete compilation of books to the tiny vowel marks. The session includes a discussion of the many books' different contents, literary styles, and history. It is in four parts:

- A: The 24 books (from Genesis to Chronicles) comprising the Bible
- B: The divisions of the Torah and the Book of Prophets (for the traditional weekly synagogue reading)
- C: Text divisions (from paragraphs to cantillation marks)
- D: The smaller literary units (from words to vowel marks)
